

Attention Men's Club,

We are getting the course ready to be able to open as soon as we get the go ahead from the city. With that being said, Joe is a 1 man crew and he has an entire golf course to get ready. We are asking for some help from anybody who is willing.

This will be completely at your own risk. The biggest help we would need is raking. Unfortunately you'd have to bring your own rake and practice "social distancing" while on the course. I would post the areas on the course that need to be raked on a whiteboard outside the pro shop. When you get here, you can put a check mark by what area you are going to do, and when you are leaving. If the area is clear, you can X it off. If it isn't clear, erase the check mark and the next guy can head that way. We would really appreciate any help we can get.

Mike
